Innovation Ecosystem

The Institute focuses heavily on supporting innovation and creativity. We have established institution innovation council (IIC) as per the norms of Innovation cell, Ministry of HRD, Government of India during IIC calendar year 2018-19. Under IIC, the institute organized number of workshops and activities for students and staffs to explore and promote their innovative ideas.

The institute also promotes the faculties and students to work together and in collaboration to consolidate their ideas and bring out the prototypes and to file the patents for same. Institute also provides financial support to faculties and students under ARC policies for file a patent on innovative ideas which indirectly support start-up.

Institute is in the verge of establishing a dedicated incubation centre, but faculty members presently advise students on an individual basis to nourish their ideas for start-up. To foster mentor-mentee contacts for the development of an innovative ecosystem, we have included research activities as a key academic duty for local guardians. The planned incubation centre will make the best use of the available infrastructure and resources.

At present the available facilities are being utilized for extending training and instrumentation facilities. However, our team has envisaged an incubation centre with a vision "To establish effective a viable support system for scientific and entrepreneurial endeavours."

Our focus areas include:

- Nanotechnology based formulations
- Formulation of phytopharmaceuticals and nutraceuticals
- Preclinical evaluation of Drug or Herbals for different pharmacological activities
- *In silico* screening and custom synthesis of novel chemical entities
- Drug and food testing
